What's MNT?

MNT is a killer disease caused when tetanus spores, found in soil everywhere, come into contact with open cuts during childbirth.

Can MNT be stopped?

ELIO GAROZZO Governatore 2014/2015
"Liberiamo le energie"

Yes! MNT is highly preventable.

Just three doses of a 60-cent immunization protect mothers, who then pass on the immunity to their future babies.

The ELIMINATE Project

With The Eliminate Project, **Kiwaniis International** and **UNICEF** have joined forces to eliminate maternal and neonatal tetanus.

ELIMINATE

Kiwaniis eliminating maternal/neonatal tetanus

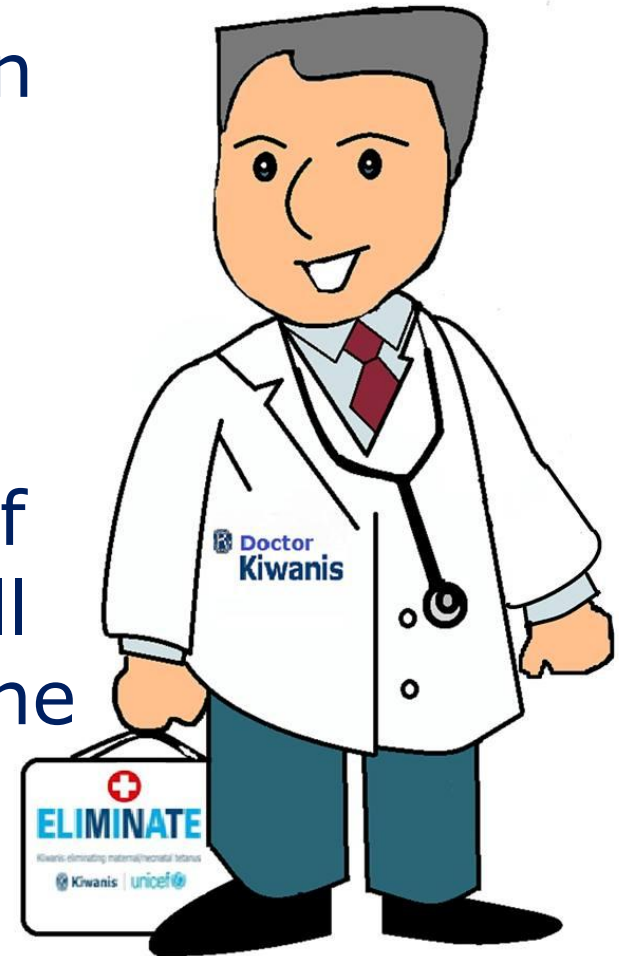

The ELIMINATE Project

To eliminate **MNT** from the Earth, more than 100 million mothers and their future babies must be immunized.

This requires vaccines, syringes, safe storage, transportation, thousands of skilled staff and more. It will take US\$110 million — and the dedicated work of **UNICEF** and every member of the **Kiwanis** family.
